

## GOLF FINALS PLAYED SUNDAY

The final game in the Herald Playoffs in District 15 (which takes in the towns of Carbon, Irricana and Trochu) was played over the Carbon Golf links on Sunday afternoon last. On account of Trochu not being able to attend, Irricana came to the rescue and sent players to Carbon on Sunday to give the Carbon players their necessary game to complete the 4-game series. The course was in fair shape for the games, scores for the competing Carbon players being: E. Rouleau 76; L. Poxon 77. With this final game Rouleau was declared winner of District 15 and is entitled to represent this district at the Alberta District Golf Association playoffs for provincial district honors, to be played in Calgary on July 23, 24 and 25.

Rouleau finished the playoffs with a total score of 304 for 72 holes of play. P. Hallam of Irricana, came second with 312, and L. Poxon of Carbon came third with 315. The scores made by these players on the different golf courses were as follows (with two games being played on local courses and one game each on the other golf courses of the towns competing):

At Carbon—Rouleau 75-76; P. Hallam 82; L. Poxon 68-77.

At Trochu: Rouleau 78; P. Hallam 81; L. Poxon 88.

At Irricana: Rouleau 75; P. Hallam 72-76; L. Poxon 82.

## TROPICAL VALLEY IN NORTH SOUGHT

A search for a hidden tropical valley in the mountainous sections of northern British Columbia where rare biological and botanical specimens are believed to exist, is the object of an expedition headed by Dr. J. Norman Henry of Philadelphia, which left Edmonton last week for the north.

The members of the expedition include Dr. and Mrs. Henry, H. G. McCusker, Canadian Government Topographer who has been loaned to the party to chart the region, about which very little is known, and Dr. Benjamin H. Chambliss who will act as physician.

Travelling first to the Peace River country in Northern Alberta over Canadian National Railways and then into the Peace River Block in British Columbia to Fort St. John, they join eleven guides headed by Stanley Clarke, outfitter of Entrance, Alta., their pack train of 80 horses, and on June 30th they started on a 35-day trek northward to the confluence of the Toad and Liard Rivers. The exact geographical spot where this union is to take place is not definitely known, but it is in this vicinity that Dr. Henry and his party hope to discover one of the tropical valleys.

The expedition will take about three months. Five thousand pounds of provisions have already been cached on Prophet River, the half-way mark between Fort St. John and the Liard River. The final destination on the Liard River is more than 800 miles north of Edmonton.

## HESKETH NEWS

Ross Fraser and Ross Thorburn motored to Calgary last week and took in the Stampede.

Mrs. R. R. Thorburn has been visiting her brother and family the past few days.

Mrs. E. Peterson and Mr. and Mrs. Hooley were also Calgary visitors during stampede week.

Miss Alice Kesper of Edmonton is visiting her Aunt, Mrs. H. M. McNaughton.

G. W. Appleyard and J. Zeigler made a trip to Turner Valley last Wednesday.

## Alberta News

No reduction in taxes was the decision of the councillors of the town of Didsbury. It was pointed out that with the large amount of unpaid taxes it was necessary to provide a reserve to take care of the non-collection.

On Wednesday, July 15th, the ceremony of the official opening of the Gleichen pressure irrigation system will take place.

According to the Dominion Crop report published last week, Alberta will have 81 per cent of a normal crop—the best of the prairie provinces.

John Downie, a clerk in the Bank of Commerce at Carmangay, accidentally shot himself one morning last week, while taking a handkerchief from a drawer in which a .32 calibre revolver was kept.

The Hanna Fish and Game Association have accounted for 18,989 crows and Magpies so far this season.

The Bassano Board of Trade cleared approximately \$700 on their sports day, held on July 1st. \$487 of this amount was made on the drawing for a Short-horn Bull.

George Teckley, a farmer of the Rosebud District, was drowned on Tuesday evening last, when on a fishing trip. Teckley was wading into the lake and when about 25 feet from the shore he suddenly disappeared in a hole. The body was recovered.

About 3000 bushels of grain were taken in at the Cremona elevator last Friday and Saturday.

At a recent meeting of the council of the town of Youngstown, the councillors decided to lopp off 20 mills on the tax rate on town property.

The Pioneer Elevator at Youngstown is being taken down by a crew of men and the building is being taken to Garden Plains, where it will be re-erected.

## CHRONICLE ADS PAY

## POOL TO PAY 30 CENTS A BUSHEL

Approximately 70 delegates of the Alberta Wheat Pool gathered in the city of Calgary on Monday for the main purpose of discussing the co-operative organization's policy for the new crop year which starts August 1.

The delegates met in district conferences each of the seven districts in the province holding a separate meeting, and the main sessions with all the delegates together with the officers of the Pool, opened on Tuesday.

Co-incident with the rumors that the pool would consider changing its policy, temporarily at least, to allow the members to sell on the open market instead of taking the small initial payment necessary with the low price of wheat at the present time, came the announcement that the Alberta Pool would pay 30 cents per bushel as the initial payment, this price based on No. 1 Northern grade of wheat.

July 15 has been set as the cut-off date for the 1930-31 Pool, and grain sold after that date will be classed as the new crop with payment based 30 cents per bushel for No. 1 Northern. This price, however, will be subject to revision according to the market changes.

The coarse grains pool, which suspended operations last year, will not resume marketing for the new crop year, the announcement concluded.

## 6th Government Crop Report

(Issued by Dept. of Agriculture)

According to telegraphic reports received by the Department of Agriculture on Friday, rain has been fairly general over most of the Province during the past ten days. In some districts there was as much as eight inches in the month of June. The dry weather of the Spring caused the early sown grain to head with short straw and rather thin stand. Later seedlings are stooling well, and all crops have greatly improved with the recent rains and warm growing weather.

In parts of the south and south-eastern central districts the heavy winds and dry weather during the month of May caused serious damage, so that the wheat in these areas will be a light crop. In the districts west and east of Edmonton to the Saskatchewan border and through the north-eastern area the crops show a heavy stand. From present prospects it would appear that this district will have one of the heaviest crops it has yet produced.

Good conditions exist through the north-western section. Crops north of the Peace show strong growth with about 30 per cent in head. South of the river more rain is needed, though nothing is suffering at present.

Grasshoppers have been active in small districts in Southern Alberta. The damage has not been extensive to date, owing to the fact that control measures have been adopted by the use of poison bait. Cutworms have done some damage in scattered areas.

Alfalfa cutting is under way in the irrigated districts of Southern Alberta and is a very excellent stand.

The hay crop generally will not be large. From prospects, however, there will be plenty of feed for live stock. The general crop prospect can be considered very fair.

## ALARM RINGS, POLICE RUSH AND DISCOVER DOG

SARNIA, Ont., July 13—Responding to an alarm, city detectives rushed into the city treasurer's office here, early this week. Opening the door, they were confronted with "Pat" the white haired terrier owned by Alderman James Barr, who had gone to sleep beside the public wicket. In doing so, he touched off the alarm connected to the station.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

## DIDSBURY COW TESTS 9.8

One of the highest testing cows in the world is now at Didsbury. She is "Waikiki Xenia's Fanny" and is a direct decedent of the world renowned Xenia's Sultan who was sold for the sum of \$35,000.00.

A sample of milk from four separate milkings was recently taken by F. King, Dominion R.O.P. Inspector. He ran two tests on this sample and found both to be 9.8 per cent. At the present time Mr. Norman S. Clarke who owns this cow is having a very hard battle to get her dry in time to rest before freshening.

He states that Fanny has been making butterfat at a feed cost of 52 per pound. She has been eating a ration that includes meat. The meat was finely ground and mixed with grain and fed to Fanny three times a day.

Mr. A.A. Dunkley, manager of the local creamery, states that it would be possible to churn Fanny's milk without first putting it through the cream separator. He also states that this is the highest testing milk that he has ever heard of.—Olds Gazette.

## SCHOOL LANDS PAYMENT MADE

First fruits of the transfer of the school lands from the Dominion to the Province under the natural resources amendment was made apparent last Thursday when Hon. R.G. Reid, provincial treasurer, received from the finance department a Dominion Government debenture maturing in July 1934, and bearing interest at five per cent on the amount of the fund.

As the fund belonging to Alberta totals \$9,564,569, the interest on this amount at five per cent, payable semi-annually, will make a welcome contribution to Provincial coffers.

A three-year debenture was issued by the Dominion as from July 1 of this year.

The total amount of the fund represents the amount obtained from the sale of school lands in this province since its formation in 1905. While this is the accumulated principal, interest has been paid each year. Under the natural resources agreement, all the school lands were included in transfer.

After considerable negotiation between Premier J.E. Brownlee and Premier R. B. Bennett. It was decided it would be better for all concerned if the actual principal was not as yet transferred.

It was felt that the Dominion, by retaining possession, could float a better rate of interest than even the Province could get by investing the amount of its own debentures. Thus with the Province deriving about \$500,000 a year in interest from this source with the principal to be turned over in three year's time, the agreement is considered by financial authorities to have been beneficial to the Province.

## HAY AVAILABLE FOR DRIED- OUT AREAS IN THE WEST

WINNIPEG, Man., July 15—The drought-afflicted districts of Manitoba and Saskatchewan will be able to secure 25,000 tons of hay from the Crown lands in the Northern portion of this province, according to reports submitted to Premier John Bracken. The hay is available in the Carrot River district meadows west of The Pas and in the Swan River and Birch River country.

## PROV. GOV'T TO ERECT BRIDGE

In way of reply to the letter sent by the Village Council to the Department of Public Works last week, Mr. McPherson, a government man, was in town on Monday and in an interview with the secretary of the Village, announced that he was sent by the Department to build a swing bridge to the island, the work to get underway immediately. We understand that this work will be done by the bridge crew at present putting in the traffic bridge near the C.P.R. Depot.

This is quick work and the Village of Carbon has received more than it bargained for. When the secretary wrote to the Department it was with the idea that they would pay part of the cost of a structure and the Village the rest. However, the way it is turning out the tax payers of the Village of Carbon will not be burdened with any debt in connection with the structure.

## A WAY TO REMEMBER

OTTAWA, Ont. July 15—Hon. Peter Heenan, former minister of labor, was absolutely certain of one date when speaking in the House of Commons last week. He had occasion to say that Hon. G. H. Ferguson, at that time the premier of Ontario, was in Great Britain in 1928. "I know he was there because I met him and we had a drink together," he added amid mixed applause and laughter.

## GOOD DEMAND FOR CANADIAN CATTLE

Prospects are bright for a continuance of the Canadian cattle trade with Britain for some months at least, with prices holding steady at a level with those paid for Irish cattle, according to reports received by the agricultural department of the Canadian National Railways.

## C. N. R.'S LITTLE COUSIN

If Canadians are proud of the longest railway system in the New World and the second longest public-owned railway in the world, the Canadian National Railways, the British West Indies colony of Barbados is none the less proud of its own "national system."

The Barbados Government Railway, taken over by the state in 1926 from a private company, is one of the shortest in the world. It is 24 miles long and traverses the little tropical island from north to south, having Bridgetown and St. Andrew as its termini. The Canadian National's trains run over standard gauge rails, separated by four feet eight and one half inches. The Barbados "National" trains run over a gauge of two feet six inches.

## MOTORBOATING DRAWS PRINCE

LONDON, July 15—The Prince of Wales has taken up a new sport—motorboating. He has ordered two new racing boats, but the manufacturer of the craft said the Prince will not compete in open races, but probably will organize competition among his flying and motoring friends.

## Lessons Of The Depression

During periods of depression such as the world is at present experiencing the almost universal tendency is to look upon the gloomy side of things to the exclusion of everything that is hopeful and encouraging. As a result there has been a plethora of dire forebodings, headshakings, and pessimistic utterances, accompanied by an arid scarcity of optimism and hopefulness. People generally can see, and seeing things continually dwelt upon, the darkness, the losses, everything that is bad in the present situation, but it is rare indeed, to discover any one who finds something good, or prophetic of future good, arising out of existing conditions.

Yet nothing is wholly bad and there may, and often does, develop out of the most adverse circumstances some of the best and finest things of life.

We have observed, for example, a larger sympathy on the part of the average person for their less fortunate fellow-citizen than has been noticeable for a long time. Fewer people are inclined to turn a deaf ear to stories of distress or to appeals for help. The man out of work is not, as a rule, ruthlessly turned away but is received kindly and sympathetically even though it may not be possible to do much or anything for him. Thousands who have little to spare are nevertheless dividing that little with those who have nothing. There is, we believe, less hardness and more sympathy in our relations one with another as a result of an appreciation of existing conditions and problems. The development of such a feeling is so much gain.

It is also true, or at least we are inclined so to believe, that many people are beginning to realize the true inwardness of life,—that work, about which in times past they have been inclined to grumble and regard with distaste and as something they would like to avoid, is, after all, one of the greatest blessings conferred upon man by the all-wise Creator of the universe. Today, employment, the opportunity to work, is regarded by nearly everybody as one of the greatest boons they can obtain. Idleness is not a luxury, is not to be desired; it is a heartbreak, a calamity. The impelling necessity to work has been found to be not a hard taskmaster, but a kindly benefactor. The hardest work of all is not to be able to work.

Another much needed lesson which some of us are learning is how puny mere man is after all. In days of prosperity and mighty mechanical achievement and progress, there was a growing inclination to regard ourselves as self-sufficient, as supermen, boastful and vain. And this individualistic self-sufficiency was reflected in national self-sufficiency. We could live unto ourselves alone, as least so we thought, order our own lives, and disregard the rest of the world. But we have discovered we are not supermen, nor gods. The rains cease to fall, blighting winds blow and intense heat prevails, and mere man finds himself helpless. He can do nothing. His accumulated savings are soon eaten up. He is in distress, and his condition of distress reacts upon other people and nations thousands of miles away, just as their difficulties and losses react upon him. One suffers; all suffer. Mankind is a brotherhood, and there is one ruling Power over all. These are truths which cannot be denied or ignored.

### Prodigy Finishes Up At Adding Machine

Brooklyn Boy Slumps After Unusually Brilliant Start

This is the time of year when the college graduate goes forth to conquer the world. And yet—William J. Sidis at the age of six months knew the alphabet. When he was but two years old he could read and write with ease, spell correctly and carry on an intelligent conversation. By the time he was four he had mastered four languages. At six years of age he completed an entire eight-year grammar school course in six months, and two years later he was graduated from the Brooklyn High School after completing the four-year course in half a year. Entering Harvard University at the age of 11, he was graduated with honors four years later. Sidis then took post-graduate work and became a teacher of mathematics. This boy wonder—says John Hix, in his *Strange As It Seems* Illustrations—was discovered five years later running an adding machine in a New York store.

An Accomplished Linguist  
Lieut.-Gen. Sir W. Edmund Ironside, who has just been appointed Lieutenant of the Tower of London, can speak at least a dozen Oriental languages. He is six feet four inches tall, and was commander-in-chief of the Allied Forces in Archangel, Russia, in 1918-1919.

## Could Not Check the Summer Complaint A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharges checked, so I went to the druggist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

### Drought Decimates Ducks

Dry Year Takes Heavy Toll Of Young Broods

The death rate among young wild ducks in Saskatchewan this year, owing to the drought, has been extremely heavy, was the opinion expressed recently at a special meeting called between members of the Saskatoon Fish and Game Protective Association, Arthur Etter, game guardian, of Saskatoon, and Dr. W. B. Bell, of the Bureau of Biological Survey, Washington, D.C.

The extreme seriousness of the situation could not be stressed too much, was the unanimous opinion, and the sportsmen want the shooting season greatly curtailed if the United States will do likewise.

Dr. Bell said he had come to Saskatchewan because of the alarming reports received by his department. The department had not been sure that the reports had not been exaggerated and had decided to investigate for itself. "And I can assure you," declared Dr. Bell, "the reports have not been exaggerated. Mr. Etter and I have just finished a 500-mile trip and have counted exactly 400 ducks and of this number only 24 were young ones. On one lake we counted 320 ducks and there were no young ones amongst them. We believe that the adult ducks had gathered after their broods on a number of small sloughs had died owing to the drought."

Mr. Etter stressed that the trip had been a very thorough one from the duck investigation standpoint. At every point touched very full enquiries had been made among sportsmen and farmers and they had declared that the death rate had been extremely heavy. It was doubtful if one per cent. of the young duck population in a great portion of the province had survived the drought.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfitted for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

### Canadian Mines Pay Dividends

Several British Columbia Companies Distribute Substantial Sums

All mines are not just holes in the ground into which suckers drop their money. Despite talk of hard times and low-priced metal markets, Canadian mines are still paying steady dividends.

Several British Columbia companies are to pay out their usual quarterly dividends. Some of them amount to quite substantial sums.

Pioneer Gold will pay out over \$52,000.

Premier Gold will pay out \$150,000. Howe Sound (which operates the Britannia Mine) will pay out \$240,000.

Consolidated Mining and Smelting (which operates the Sullivan Mine and the Trail Smelter) will pay out \$630,000.

Sir Donald Mann tells us of declining to buy the Sullivan when it was offered to him by the original tow-headed Sullivan for \$12,000. Since then it has had spells of good luck when lead and zinc were high, when it made \$60,000 a day.

The day may not be very far distant, when the great pre-Cambrian shield which blankets northern Saskatchewan, will be supporting big mines and paying out millions in quarterly dividends.—Regina Daily Star.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and impairing a healthy tone to the system most beneficial to development.

### Made Poor Guess

"The place will never amount to a hill of beans." This was the prediction of Sergeant Joseph Herbert 65 years ago to Winnipeg's future. He gave away the land the Crown granted him, and marched east with the Royal Canadian Rifles when that regiment was recalled to Halifax. Recently a son of the sergeant of Red River days visited the city. The parcel of land his father gave away is now the site of the City Hall.

W. N. U. 1898

### Fastest Atlantic Crossing

Empress of Britain Sets New Record In Mercantile Marine of Any Country

Making the fastest trans-Atlantic crossing ever recorded by the mercantile marine of any country, the new 42,500 ton Canadian Pacific liner Empress of Britain at 3.15 a.m., Monday, June 22nd, recaptured the Blue Riband of the Atlantic for British shipping. Establishing a new world's record of four days, twelve hours and thirty minutes between Cherbourg and Father Point, mails were landed and the pilot taken on, in four hours and twenty-six minutes better time than the previous record of four days, seventeen hours and six minutes made between Cherbourg and Ambrose Light where pilots are taken aboard New York bound ships. The Canadian Pacific now holds the Blue Riband on both the Atlantic and the Pacific oceans, the Empress of Japan holding the record for the run from Vancouver to Yokohama.

### B.C. Timber Resources

Industry Gives Steady Employment To 45,000 Men

Average annual revenue received by the Crown from forest sources in British Columbia during the past ten years, according to an official report, has been in excess of \$3,725,000; average value of materials produced has been more than \$80,000,000, and during this time the industry has given steady employment to about 45,000 men.

It is estimated that there are at present in British Columbia commercial stands of timber covering about 16,900,000 acres. Of the more important commercial species the amount of timber accessible for immediate future use is approximately as follows: Douglas Fir, 54,000,000 board feet; Western Hemlock, 61,000,000,000 board feet; Western Red Cedar, 60,000,000,000 and Spruce, 70,000,000,000 board feet.

### Reduction In Colds

A ten per cent. reduction in frequency of colds among a group of 14 Cornell women students is the latest record of using scientific knowledge. Seventy-five Cornell men taking the same treatment showed a reduction of 42 per cent. The cold protection is ultra-violet light, alkali, diet, ventilation and sleep.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

The reason so many people miss the road to happiness is because when they come to it it looks so much like a detour they take the better-looking side.

## UNIVERSITY OF MANITOBA

### WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A., and B.Sc., including B.Sc. (Phar.), and M.Sc. Through its FACULTY OF ENGINEERING AND ARCHITECTURE courses leading to the degrees of B.Sc. (C.E.), B.Sc. (E.E.), M.Sc. and B.Arch.

Through its FACULTY OF MEDICINE courses leading to the degree of M.D. and C.M.

Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (H.Ec.).

Through MANITOBA LAW SCHOOL, an affiliated institution, a course leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to

W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

### Decrease In Forest Fires

Decided Drop In Prince Albert District This Year

A decided drop in the number of forest fires in the district is very noticeable compared to last year. The number totals 60, spreading over a district including the Prince Albert area west to the Big River forest reserve and east to Nipawin. Last year at this time there were 60 fires in the Nisbet reserve alone.

A reason given for the present low average in fires is the rewards offered for information leading to the arrest and conviction of persons willfully starting fires. In addition to this, the campaign against forest fires is bringing good results, also the radio telegraph in operation enables the rangers to keep in touch with each other as to conditions.

The co-operation of the public is asked to enable the forestry officials to retain this high standard throughout the dry season when tourist traffic is general.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

### London Still In Lead

Population Exceeds New York By Over Million

London still is the world's largest city by a margin of more than a million inhabitants over New York.

Metropolitan London, containing the "outer ring," which corresponds to that known as Greater New York, has a population of 8,202,818, preliminary summaries of the census taken April 26 indicate. The population of Greater New York in the last United States census was 6,981,917, or 1,220,901 less than its British rival.

## WORLD HAPPENINGS BRIEFLY TOLD

Displays of 269 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviatrix who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Laugel Koch Arctic Expedition, who became violently demented when he saw his first movie at Thorshavn, Faroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entree dishes. The gift was in recognition of his 61st birthday.

In front of the Australian commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

### Vancouver Wheat Shipments

Wheat exported from Vancouver for the current crop year will exceed 70,000,000 bushels, according to estimates of the Vancouver Merchants' Exchange. For the present crop year to June 11, a total of 65,872,425 bushels were moved, compared with 43,917,181 bushels for the corresponding period a year ago.

### Teacher—Rollo, what is jam?

Rollo—Jam is what causes bread to taste not so nice when there's none on it.

"In conclusion, I would plead as an extenuating circumstance the absolute innocence of the accused!"—Sondagnisse-Strix, Stockholm.

W. N. U. 1898

## Cunard Week-End Cruises

### Something New In the Line Of Ocean Travel

A pioneer steamship company for the past 91 years, the Cunard Line came to the front this year with something new in the line of ocean travel; the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Cunard, founder of the line which bears his name.

The Cunard's week-end cruises are made by the line's express steamers, the "Berengaria," "Aquitania" and "Mauretania," among the largest and finest ships in the world.

These liners steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular deck games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horserace on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying prone on the hatch tops or take sun baths in deck chairs; they loiter about in bathing and various kinds of sport suits, the girls displaying many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck from stern to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing her all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise a great crowd moves to the rail to note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner.

At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

### Onion Diet For Sheep

Sheep flocks on Colorado's western slope have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sacks of onions have been given sheep owners, as there has been no market for them.

## SUNDAY SCHOOL LESSON

JULY 19

### SOCIAL SERVICE IN THE EARLY CHURCH

Golden Text: "He Himself said, 'It is more blessed to give than to receive.'—Acts 20:35.

Lesson: Acts 4:32-35; 6:1-7; 9:36-39; 2 Corinthians 9:1-15.

Devotional Reading: Psalm 112:5-10.

### Explanations and Comments

Sharing Possessions, Acts 4:32-35.—There was the greatest unity of feeling and purpose in the early Christian Church; as the proverbial expression has it, they were of one heart and one soul.

Settled on the northwestern shore of the Dead Sea, and living in scattered communities throughout Palestine at this time, were the Essenes, a sect that literally had all things common. Each one deposited whatever he possessed in a general treasury, of which several managers took charge, supplying from it the needs of all. In Egypt there was a Jewish sect called the Therapeutai whose members gave away all their possessions when they joined the order, and there was among them no distinction of rich or poor. It is said of the disciples at Jerusalem at this time that "not one of them said that aught of the things which he possessed was his own; but they had all things common." With them, however, the giving up of possessions was voluntary (5:4)—each one regarded his property as held in trust for others.

With great power the apostles testified to the resurrection of the Lord, and great grace—God's free favor—was upon them all. The proof of the Divine grace was shown in the wonderful generosity of the Christian community; as need for assistance arose among the poor, those who had lands or houses sold them and brought the amount received to the apostles for them to distribute. "Laid them at the apostles' feet" is a figurative expression which doubtless arose from the Oriental custom of laying gifts at the feet of kings; it meant that the money was left in the apostles' control.

It is interesting to recall here what Aristides wrote to the Emperor Hadrian about the Christians of those days: "They rescue the orphan from him who does him violence, and he who has given to him who has not, without grudging. And if there is a man among them who is poor or needy and they have not abundance of necessities, they fast two or three days that they may supply the needy with their necessary food."

Sharing Responsibilities, Acts 6:1-7.—The last verse of Chapter V. tells us that the disciples ceased not to teach and to preach Jesus as the Christ; now we learn that the result was the multiplying of the number of Christ's followers.

The apostles called a public meeting of the church and put the matter before it. It was not right, they told the assembly, for them to neglect their work of preaching to look after the distribution of food to the needy—to "serve tables"—and therefore they counseled that seven men be chosen, men of good report, full of the Spirit and of wisdom, who should

be appointed for that work. As Chrysostom observes, "It needed great philosophy to hear the complaints of the widows." From the Greek word "diakonein," translated "serve" (serve tables, verse 2), comes our word "deacon"; and it is generally thought that from this choice of the Seven for a special service the office later sprang. In Phil. 1:1, Paul refers to deacons, and in 1 Tim. 3:8-13, he notes the qualifications necessary for this office.

As for the apostles, their time would then be free to continue steadfastly in prayer and carry on their work of preaching and teaching.

"The secret life of prayer alone prepares and qualifies for the public life of ministry."—J. Stuart Holden.

"Rivers of vitality have their rise in souls that are on their knees before God."—J. H. Jowett.

## New Senators Appointed

Patrick Burns, Of Calgary, Alberta, Named a Member Of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur Marcotte, K.C., Ponteix, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lessard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turriff last fall.

The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

## Introduced Amendment To Companies' Act

Bill Aims To Aid Employees In Purchasing Homes

Amending the Companies Act so as to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. C. H. Cahan, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

## Research Grants

Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his second year in medicine, and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term at the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

## Keeps Editors In Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention in Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is reminiscent of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1930 by the Lake Erie and St. Clair Pughshers' Association. At that time Hugh Savage, of Duncan, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with a silver plate setting forth its antiquity and usages.

## War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marshal Joffre reformed the French army for the defence of Paris.

# Make Your Windows Pay

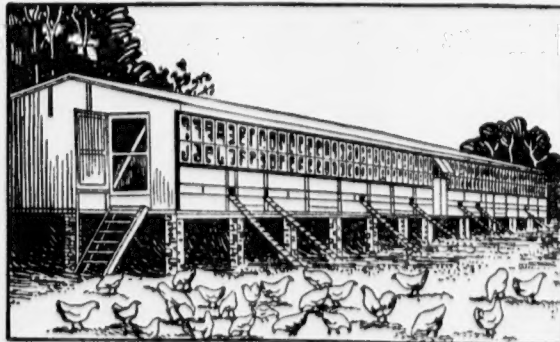

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

## WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

## Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,300,000 cattle hides taken off last year in Canada showed unmistakable evidence of damage by warble fly grubs and the value of the finished leather produced from these hides was reduced by at least \$700,000. The extent of the additional loss in reduced milk and beef production cannot be determined, but it is probably equal to, or greater than, the direct damage to hides and leather.

According to Dr. W. E. Graham, of the National Research Laboratories, Ottawa, who secured this information from Canadian packers and tanners in connection with the leather research programme on which he is engaged, 15 per cent of all hides taken off in 1930 had open grub holes. Damage is most serious during the first six months of the year,

over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly far they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a matter.

Farmers are recommended to seek advice as to treatment from recognized authorities.

Dr. Graham's report concludes as follows:

"Through buying hides in the fall to avoid open grub holes, tanners encounter considerable loss through interest charges on capital tied up for long periods, a loss which we cannot estimate.

The existence of grub holes in hides is, in addition to monetary losses involved, a potential source of

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 13 1/2 inches long.

when some tanners refuse to buy Canadian hides. In April and May, 1930, the percentage of hides that were "grubby" ran as high as 45 or 50 per cent. Dr. Graham states that more grubby hides are found on western range stock than on other cattle and that the percentage is 10 per cent greater on steers than on cows. One tanner gave his opinion that 95 per cent of Canadian hides showed the unsightly scars of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gullet and eventually out through the animal's back. They leave holes which gradually close but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been riddled by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

That the problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not

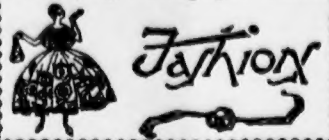

annoyance and ill feeling due to difficulties in arriving at a proper estimate of an allowance for grubs.

"It is felt that under the present system of marketing in Canada the farmer has not come to realize fully the difference in value between "grubby" and "clear" hides. All Canadian hides sell for less because of the warble damage. In the British Hide Markets during 1930 a classification for warbled hides was introduced and as a result warbled hides are realizing from one to three cents a pound less than clear hides. Substantial evidence has been received showing that a considerable portion of the difference in value between a warbled and an unwarbled animal now finds its way back to the British farmer.

"It is pointed out that in Denmark an Act was passed by the Legislature in 1922 making it incumbent on every farmer to take measures to exterminate warble fly larvae appearing in his herd. As a result, the total percentage of hides with open holes for the entire year fell from 20.5 per cent in 1922 to 4.5 per cent in 1924. The very high percentage of animals infested annually in Canada should be regarded as a matter of national concern and warrants Dominion-wide efforts.

"Data on the percentage of grubby hides taken off this year will be obtained as soon as the grub season is over. Data already submitted for 1931 show 70 to 80 per cent of grubby hides on some western stock for March and April."

356

SIMPLE AND LOVELY—YOUTHFUL

Here is a blouse you'll love. It's not alone flattering and youthful but thoroughly wearable.

A dotted crepe silk made the original in white ground with skipper blue nickel sized dots. It's a combination that fits into many colour schemes. It's a type that may be worn with a suit or with a separate contrasting skirt or made as a complete frock worn with a matching skirt.

Net, eyelet batiste and lace are dainty suggestions.

Handkerchief linen, printed batiste, dotted swiss, pastel crepe silk and satin are ideally suited to this model.

Style No. 356 may be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

The 36-inch size requires 2 yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Willing To Take Chance

People are getting more air-minded every day, or maybe it's the unemployment situation. Fearing that no one would be on hand to leap from a balloon at the height of 1,500 feet, the Audubon Park Commission, New Orleans, advertised an offer of \$3 for every minute in the air. The advertisement was answered by 121 men.

## Population Of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

### Praise For Livestock From Saskatchewan

If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Waldron, markets commissioner of the province, from the Co-Operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, she need have no doubts as to satisfactory prices; even on low value markets they would command the highest prices available," the letter received by the commissioner states.

Conjecture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of concern.

A more strict interpretation by Saskatchewan livestock breeders of export cattle is looked upon by Commissioner Waldron as the likely cause for the general good quality stock shipped.

"The last shipment of cattle received per the S.S. Manchester Citizen was about the best ever received from Canada and has done more good in two days than a whole year of poster advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates. "The prices realized on the selected of this shipment were equal to our selected Norfolk cattle," it continued.

"Our markets will be favorable for another six weeks until the Irish grass fed cattle arrive, although even then your selected steers (young finished) will always be in good demand at top market prices," the letter concluded.

### Farmers Must Fight Cutworms

Advised To Work Weed Patches and Leave Clean Land Alone

Cutworm losses in the areas affected this year will be heavier in 1932 unless exceptionally heavy rain-falls occur is the prediction of the Dominion laboratories at Lethbridge. At the same time the entomologists prophesy that areas lightly affected this year will suffer greater losses next year.

The department suggests that farmers set the worms to work clearing out Canada thistle and other weed patches by working those lands between July 25 and September 7, when the cutworm eggs are laid. Clean land should not be touched between those dates, the authorities state, as the worms work only in loose soils.

England has eight autogyros.

The biggest population ever recorded for Great Britain—and the lowest birth rate in the last 50 years—are features of the preliminary report of the registrar-general, dealing particularly with England and Wales, following the census of April 26 last.

The population of Great Britain on census day was 44,790,485. The population of England and Wales 39,947,931, and of this figure there were 20,809,087 females to 19,138,844 males.

The total population rate—685 persons to the square mile—is higher than in any country recorded, with the probable exception of Belgium.

But the country now ranks lower than any other except Sweden in the birth rate. Births registered were 6,930,000, compared with 8,281,000 in the previous census.

"Despite the fact that the marriage rate has been well maintained, particularly at the younger ages at which the bulk of births occur," says the report, "and despite the further fact the exceptional post-war spurt in the birth rate itself had only just passed its maximum at the beginning of the decennium, the total births registered are 1,250,000 fewer than in the preceding period, which covered the war years, when the birth rate sank to levels never before recorded.

"The full significance of the fall will be but dimly appreciated for many years. Any temporary satisfaction felt in the reduction of the number of unproductive mouths to be filled during the present period of economic stress must sooner or later be qualified by realization of the more profound secular issues involved."

As a partial set-off against the decline in births the deaths registered were more than 500,000 fewer than in either of the two preceding ten-year periods.

### Trade Emporium In China

Novel Building To Be Opened In Shanghai This Year

One of the most novel modern buildings in China is to be opened in Shanghai this year. It is a trade emporium being erected by the Continental Bank of Shanghai, and occupies an entire block on Nanking Road. The building will be seven stories high, and will have four elevators in different parts. There also will be accommodations for a modern hotel, restaurants, offices and shops. To enable automobiles to reach any part of the building a "T" shaped lane will be constructed inside.

### Works Both Ways

Idleness Is Bad For Sane As Well As Insane People

Idleness, says the physiologist, is bad for the insane. It is bad, too, we think, for the sane. Hard work may in some measure reclaim the insane or at least help them to justify their existence. But enforced idleness has a cruel trick of unhinging minds that brood too deeply on the cares of this world; and before we reclaim the maimed minds of our race we should see to it that those who are still whole shall be kept whole to the end.

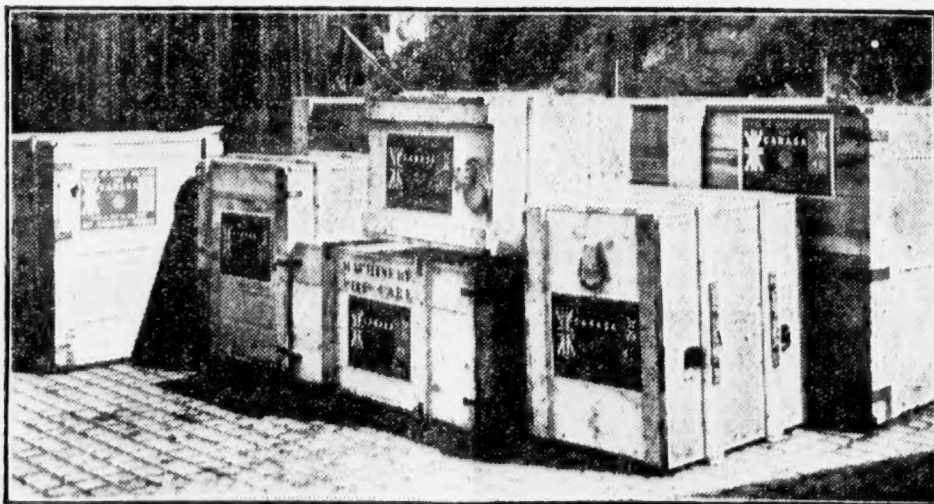

Marble buildings and statues of ancient Greece were not the white objects that they are sometimes thought to be, but were painted in bright, soft colours.

Slam is developing its automobile roads through the jungles.

"I dream of you day and night, Miss Mimi!"  
"Ah, that is why you are always so sleepy."—Lustige Koelner Zeitung, Cologne.

### "CANADA SENT US THIS ORDER, BUY CANADIAN PRODUCE"

This interesting picture, just received from England, shows the latest campaign designed by the hard-working Empire Marketing Board to boost the products of the Dominions and Colonies in the British Isles. The photograph shows a number of huge packing cases on one of the station platforms in England containing a consignment of British steel for Canada. On the sides and tops of these cases are nailed boldly labels bearing the words "Made in Great Britain for Canada." Under these words are the Union Jack and the Canadian Ensign in color and the words "Canada sent us this order, buy Canadian produce." This message is intended by the Empire Marketing Board to convey to all who may see it, whether at the workshops before departure, or in the course of the journey to the ports, that Canada is buying goods from the Motherland and that the people in the British Isles should reciprocate. The new scheme is meeting with an encouraging response.

"How strangely they play."  
"Yes. They are exhibition dancers, and they practice while they play tennis."—Der Brummer, Berlin.

## Harsh, Gripping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

### CHAPTER XXII.—Continued.

Her eager groping for courage tore the old man's heart; but he answered with well-simulated cheer: "O' course I do! Like as not they're safe and sound on some nice, cool island, with plenty o' coconuts to eat, and so much good fish that Nick'll hate to see Friday come round after he gets back. I ain't a-goin' to let myself think they ain't safe, dearie, and you mustn't neither. Only" (and in spite of an heroic effort his voice trembled), "only the waitin's powerful hard."

It was evening. The little boys were in bed, and Gay and Simeon were on the side porch, looking across the garden to the white pillars of Halliday's fine old house. Lights were on in the room that had been Angela's, and they could see him moving about, doubtless doing the inevitable last things before his departure early in the morning. When the room was dark again, Simeon stirred, and arose.

"Julie's out," he said. "Halliday told her to go 'cause she'll have to stick so close while he's away. He wants to see you, Gay, to say good-bye. He asked if I'd come over and set a while, so's not to leave little Martha all alone. You'll see him, won't you, dearie? He said if 'twould bother you he wouldn't come."

Gay hesitated. Since the news of the probable disaster she had seen no one save the Maxwells, and, much as she liked James Halliday, she shrank from talking with him. How could she offer sympathy to one whose wife had been, she felt sure, only a millstone about his neck? What could she say? His was not a sorrow like her own—yet.

Suddenly Gay drew a long breath. Halliday had stepped out onto the porch and dropped into a chair, his face buried in his hands. Something in his desolate figure brought understanding. She saw things in a new light—a truer proportion. After all, his was the greater sorrow—not hers. She had her memories—he had only regrets. What Mary Maxwell's maturer mind had grasped at once, Gay had to learn by groping and through suffering. Of course she would see James Halliday!

She looked up at Uncle Sim's ungainly figure, still hovering uncertainly at her side.

"If—if you don't feel just equal to it, dearie—" he hesitated; but Gay said:

for **PIMPLES**

**Clear up your skin!**

# MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 1393

"I do, Uncle Sim. I want Mr. Halliday to come. Tell him to come now."

"Well," said Simeon relievedly, "maybe it'll do him good to talk. He don't look well."

"You're very good to see me," said Halliday. He had drawn a chair close beside Gay's hammock, and had taken her hand. "I'll try not to tire you, but really, there's a good deal to say. Do you mind if I do most of the talking?"

She smiled, and felt suddenly an immeasurable relief. The interview would not be hard.

"First about Martha," he went on. "In all probability this is an unnecessary precaution, but if anything happens to me—if by any chance I don't come back (it's absurd to think of it, dear Mrs. Hastings, but I've had to consider everything this last week), I've made you her legal guardian. I'm not trying to put more burdens on your shoulders, but—I have no one to help me. My sister's too much of an invalid to take such a responsibility; and all I ask is that in case it is necessary you will find my little girl a suitable home—see that she's treated with kindness, and educated as you think best. There will be plenty of money, always, I won't tire you by going into details. I just wanted you to be prepared; though I'm sure I'll never have to ask the favor of you."

"It's not a favor, Nick saved little Martha's life, and I love her because of that. I'll promise you now, Mr. Halliday, that if ever she needs me I'll care for her as if she were my own. I should have anyway, without the promise."

He gripped her hand. "I know. You've been wonderful to her already—more of a mother than she's ever known, or ever will know. I'm eternally grateful. I only wish I could do something for you."

"But you're doing—everything! To know that you're searching for Nick—why—it's all that I have to live for—that hope! I've written a letter for you to take to him, Mr. Halliday. The writing of it eased my heart a little. If you don't find him you can bring it back to me; but—but you won't leave a stone unturned, I am sure of that."

He smiled. "I shan't leave an island unexplored, if that's what you mean. Even to be sure of the truth—"

He paused, and Gay said breathlessly: "I know. It's the uncertainty that tears us, isn't it? Yet it's that which keeps us alive, too, I shan't let my hope die, Mr. Halliday; and my heart will be with you every minute. I—I understand just what you're suffering."

In the growing darkness she did not see that the blood mounted to his temples. For a moment he was silent; then, in his overwhelming need of sympathy, he said recklessly: "You don't. No one ever has—nor ever will. I'm not sure that I'd want anyone to—even you. But if it helps you to know that you've been—well, a light in the dark to a lonely wayfarer—that your faith, and sincerity, and truth, have made over the world for him, why, you're welcome to the knowledge, dear girl. That's all. I shouldn't have said as much, but this last week—"

He broke off abruptly; then arose, and added almost savagely: "I'll find your husband, Gay, I'll never stop looking till I can bring you some word of him at least. Good-bye. No, don't get up. I like to think of you

lying there in the starlight." He bent to her. "Give me your hands. May—may I kiss them? It's all I shall ever ask."

When he had gone, across the fragrant garden, it came to Gay with a sudden sense of shock, that not once had he spoken of his wife.

### CHAPTER XXIII.

The hours of hurricane that followed Nick's sudden waking were a nightmare that he could never remember without a shudder. It was evident that if the Sea Bird sank, no lifeboat could live in such a sea, and there was nothing to do but await with fortitude the fate that seem imminent. The storm had broken so suddenly and with such violence, that at almost the first blast their wireless had gone by the board. They could only put for the open sea, an attempt to land on the nearest island being an impossibility in the dark and storm.

It was a strange company that assembled in the cabin. Each wore his life preserver, which, Nick thought grimly, would only prolong the agony a little, for if the boat went down there would be no possible hope for any of them. Amy Myer held little Marjorie in her arms, trying to calm the frightened child whose cries at last subsided into an occasional whimper that made Angela cringe with terror.

"Can't you stop her?" she kept saying petulantly, unmindful of the fact that no one seemed to hear her. "Can't you stop her?" Yet when the child was silent her silence seemed more terrible to Nick than did her cries.

They sat huddled together, as if there were at least some comfort in close contact with humankind. To talk was impossible, even had anyone the desire to speak. When they did speak it was to shout. There was no chance for confidences—no opportunity to say, as some of them longed to say: "If you get back will you take this message?"

Nick envied the crew. They, at least, were fighting the elements. Their hands were occupied. His own felt strangely useless. Once he took Marjorie from Amy's weary arms, and despite her fear, the exhausted child slept there for a while, waking again to call frantically for her mother. It was a time of inaction and suspense that was to be forever a terrible memory to them all. Nick found himself wishing that the end would come. It seemed inevitable—a certainty, and the waiting for the plunge into those dark waters was but the refinement of cruelty.

Dawn seemed not dawn—merely a lifting of shadows. The hours dragged. At times, when the waters grew calmer for a moment, hope would arise, only to be dashed as the storm continued with fresh violence.

A second night set in. It seemed incredible that the boat still lived—that it had not been battered to pieces by such violence. Yet as the night advanced it seemed to Nick that the storm was undoubtedly subsiding. He was sure that the force of the wind was growing less. Hope rose, only to be quenched by a sudden racing of the engines. For a moment they all thought that the end had come. Marjorie, who had been fitfully asleep, cried out in terror, and springing up, her father went below. When he returned his white face would have told them of some fresh calamity, had his lips been mute.

"It's the propeller shaft—broken—we—"

(To Be Continued.)

London may limit the number of charity street collections, there being more than 300 in the last year.

## Rheumatism?

Quick relief from rheumatic pains without harm:

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures flying over China, Captain Jimmy and his friend Jed Stone seek to recover the plane which Captain Jimmy was forced to land in enemy territory. They plan a night raid on the army camp to secure food and gasoline.

Under the cover of darkness I made my way quietly toward the big tent. If our plan succeeded we would soon have enough gas and oil for our plane—if it failed, we wouldn't need any.

While I softly crept along, taking advantage of every shadow, Jed Stone was busy arriving at what he figured was the proper place to carry out his part of the plan. He dismounted, threw the bridle reins over the horse's head and probably hoped the animal would be there when he got back. Together, Scottie and he crawled close to where a lone soldier was walking his post.

Jed Stone and Scottie edged up, bit by bit, until they were right in back of a hummock and not over fifty feet from him. He was a nervous sort of soldier. Every now and then he'd turn quickly and peer out into the darkness; then he'd step along quickly as though he wanted to get away from there in a hurry. Many a good Chinese soldier is afraid of dragons in the dark. This China boy must have been sure there was a big, bad dragon on his trail for he was surely nervous.

At the end of his post he turned and started back. Scottie stood tensed, scarcely breathing. He sensed the excitement and he strained against his collar which Lieutenant Stone held tightly gripped.

The sentry was just in front of them when Jed Stone let go of Scottie's collar. "Go get him," he whispered, and Scottie was off like a rifle bullet. At the first

jump, that sentry stopped dead in his tracks, the hair standing up on his head. He was frozen still in his tracks.

Somewhere out in front in the darkness there was a sound of scurrying. Something was about to pounce on him, to grab him, but that soldier couldn't move, neither could he utter a sound. (I'll bet that you, yourself, have before now had just such a frightful nightmare.)

From out of the unknown inky blackness it came. Not till Scottie sank his teeth into his leg did that soldier cry out. He couldn't—his vocal cords were paralyzed.

But then he yelled sudden murder, pulled the trigger of his gun and was bowled over, all in the same instant.

Sentries from all over camp were running—firing as they came. Between shots I gave a shrill whistle and Scottie came up, zigzagging his way pell mell for Sunday across the camp, spreading destruction at every leap.

Excitement was working up to fever heat when rode an under officer on horseback. He had jumped on a horse and with only a halter to guide him had ridden out into the melee with goodness knows what idea in his head.

An enthusiastic soldier fired and, with better luck than usual, shot away the officer's hat. Pandemonium broke loose. Then while it was getting too hot around that corner for Lieutenant Stone, he slipped off into the darkness to find his horse. The horse had deserted at the first shot, however, so he walked on, carefully avoiding soldiers, back to our plane.

(To Be Continued.)

### Trans-Canada Telephone

#### Montreal and Winnipeg Brought Into Direct Voice Contact

A new link in the proposed trans-Canada telephone system was forged recently when Montreal and Winnipeg were brought into direct voice contact over the circuit wires of the Bell Telephone Company of Canada and the Manitoba Government Telephone system.

Inauguration of the direct circuit was without ceremony, but marked a step forward in the development of the system which is designed to keep all telephone calls from one point to any other in Canada entirely within the boundaries of the Dominion.

At the same time the third commercial Toronto-Winnipeg circuit was inaugurated. Unlike the first installations, this circuit was direct, obviating switching at North Bay.

The total pole line mileage of the trans-Canada system will be 4,263 miles, by provinces as follows: Nova Scotia, 142 miles; New Brunswick, 385; Quebec and Ontario, 1,952; Manitoba, 242; Saskatchewan, 465; Alberta, 418; British Columbia, 659.

Perslan Balm preserves and enhances women's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make hands soft and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

### Flags Of Many Nations

#### Colorful Display In London Church Is Symbol Of Many Religions

At a recent morning service in the Ethical Church at London, England, the Yugoslavian flag was presented to the church, which is in Queen's Road, Bayswater, Dr. Stanley Colt, president of the Ethical Church said: "For the first time the congregation of an English church see ranged around them the flags of many nations. They symbolize the ideal of the modern world, the ideal of the brotherhood of nations." Dr. Sibi Milicic, first secretary of the Yugoslavian legation in London, was present at the ceremony. The various colors of the flags of Great Britain, the United States, Italy, France, Belgium and other countries, gave a festival air to the building, and matched in their diversity the symbols of many religions which this broad-minded church shelters within its walls.

Nearly 5,000 persons are required in the central office alone to handle Japan's postal-savings business.

### Little Helps For This Week

"The Lord's hand is not shortened, that it cannot save; neither His ear heavy, that it cannot hear."—Isaiah lix. 1.

Sin of courage hath bereft me,  
And hath left me  
Scarce a spark of faith and hope;  
Bitter tears my heart oft sheddeth,  
As it dreads it.  
I am past Thy mercy's scope.  
Peace I cannot find. Oh, take me,  
Lord, and make me  
From this yoke of evil free;  
Calm this longing never sleeping,  
Still my weeping,  
Give me hope once more in Thee.

—Gerhard Tersteegen.

How blessed it is to know the character of Him with whom we have to do; pitiful, tender, full of compassion, keeping mercy, plentiful in redemption. We have no idea of His longing to bless; with Him all must be loving, because He is love.

—Lady Powerscourt.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worms Exterminator.

### Earns Fabulous Salary

In a suit against Robert Ripley, cartoonist, brought by Famous Speakers Inc., New York, who alleged breach of contract, it was revealed that he earns weekly \$5,000 for his cartoons, \$2,500 for films, \$1,000 for broadcasting, and \$3,000 for vaudeville.

Mrs. Daddbeet—"Call tomorrow, please."

Bill Collector—"That's what you said yesterday."

Mrs. Daddbeet—"Well make it day after tomorrow, then."

## CORNS LIFT OFF!

Pain  
Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

# TOWN & COUNTY

## Personalographs

Mr. and Mrs. Carl Moorhouse spent  
the week end at Gleichen visiting with  
Mr. Moorhouse's parents.

P. Edwards and W. Leitch were in  
Drumheller on Sunday.

Mr. and Mrs. J. E. James went into  
Calgary last week with Mr. and Mrs.  
A. Sobyski.

Mr. and Mrs. Fred Zeigler moved  
back to the farm this week, after  
spending the past two years living in  
town.

Geo. Wise and I. Guttman motored  
to Calgary on Sunday.

Mr. H. Brown and daughter are  
spending a couple of weeks holidaying  
at Sylvan Lake.

Mrs. Geo. Oliphant returned Sunday  
from Calgary after spending a week  
visiting with her parents.

L. Castiglione was a business visitor  
in Carbon the first of the week.

A. Klassen and Miss E. Halstead  
motored into Calgary on Tuesday.

A number of Carbon young folks at-  
tended the dance at Acme last week.

H. O. Laing is relieving at the local  
C.P.R. Depot while Mr. Fox is on his  
holidays.

The Carbon district is still being fa-  
vored with showers and with the warm  
weather crops are growing rapidly.  
The showers have caused a plentiful  
supply of mushrooms throughout the  
district.

The new steel bridge across the  
creek near the C.P.R. Depot is rapidly  
nearing completion and it is expected  
that the structure will be opened for  
traffic by the first of next week.

We understand that George Trepan-  
ner has purchased a pure bred 2-year  
old Guernsey cow from British Colum-  
bia. It would be wise if a few of our  
farmers would get better cows and  
fewer in number. A great saving in  
feed costs would result.

Doctor—For your insomnia I will  
give you medicine that will make you  
sleep like a baby.

Patient—If you mean like our baby  
I would rather not take the medicine.

## NEWS NOTES FROM THE SOUTH

Word was received this week that  
Mr. Henry Bertsch, of Eureka, South  
Dakota, passed away on July 9th. Mr.  
Bertsch was a brother of Mr. J. J.  
Bertsch and Mr. Christ. Bertsch Sr.,  
and to Mrs. C. C. Perman.

Mr. Gottlieb Ohlhauser went to  
Turner Valley on Friday of last week  
and returned the same day.

Mr. H.G. Kary and Mr. J.M. Ohl-  
hauser went to Calgary on Saturday.  
Gottlieb Ohlhauser Jr. was looking af-  
ter the Service Station while Mr. Kary  
was away.

Mr. Gottlieb Ohlhauser went to Tur-  
ner Valley on Monday of this week  
and took Mrs. R. Kary with him. Mrs.  
Kary has been visiting with her par-  
ents and relatives for the past week.  
Mr. Ohlhauser also took his son Got-  
tlieb down with him and together with  
his brother Art, of Turner Valley, they  
will bring home their horses.

Mr. Ed. Ohlhauser is working at the  
Guy Shell farm.

Mr. Ed Schell went to Calgary on  
Tuesday of this week to see his father  
who is still in the hospital. He return-  
ed home the same day and reported  
that his father is recovering rapidly.

Mr. E. J. Bertsch made a business  
trip to Acme on Wednesday of this  
week.

be in the hands of the printers by  
noon on Tuesday, or no changes can  
be made or ads. discontinued.

Paper goes to press Wednesday af-  
ternoon each week.

EDOUARD J. ROULEAU,  
Editor and Publisher

It pays to go after things in this  
world. And the baby with the loudest  
cry usually gets the most to eat. The  
council of the Village Council at one  
time did not think that it would do a  
bit of good to try and get the Govern-  
ment to do anything towards a bridge  
to the island, and therefore the matter  
was practically dropped on account of  
lack of Village funds. However, when  
the matter was privately brought be-  
fore the Village Council at their last  
meeting the question was discussed  
and the suggestion that the Village  
ask the Provincial Government for re-  
lief was carried out—and with untold  
success, for the bridge is to be built  
without any cost to the Village what-  
soever. It does pay to go after what  
you want in this world—doesn't it?

## FREE PUBLICITY—HAS IT MADE US RICH?

The editor, as a rule, is short on  
money but mighty long on giving space  
in his paper to the things that mean  
prosperity for his community, and too  
often the fact is lost sight of that the  
space the editor so willingly gives to  
aid his community and his people is  
his bread and butter. It is what he has  
to sell, and when he gives it away it  
is just the same as if the grocer dished  
out gratis his coffee and sugar—yet  
no one thinks of asking the grocer to  
give his coffee or sugar.
